Lab - Research Laptop Specifications

Name: Sheika Anne Kadisha A. Roxas **Section:** CPE11S4

Laptops often use proprietary parts. To find information about the replacement parts, you may have to research the website of the laptop manufacturer.

Before you begin this lab, you need to know some information about the laptop.

Your instructor will provide you with the following information:

Laptop Manufacturer:	*Dell Inc.*
Laptop Model Number:	*G3 15 3579*
Amount of RAM:	*32 GB*
Size of the Hard Drive:	*1 TB 5400 RPM HDD*

Answer the following regarding your laptop model.

1. Use the Internet to locate the website for the laptop manufacturer. What is the URL for the website?

   https://www.dell.com/en-ph

© 2015 - 2026 Cisco and/or its affiliates. All rights reserved. Cisco Public

2. Locate the service section of the website and look for links that focus on your laptop. It is common for a website to allow you to search by the model number.

   List the links you found specific to the laptop and include a brief description of the information in that link.

   https://www.dell.com/support/product-details/en-ph/product/g-series-15-3579-laptop/overview

   - This is the G3 3579's main support page. Drivers, downloads, manuals, diagnostics, warranty details, and troubleshooting are all accessible through it.

   https://www.dell.com/support/manuals/en-ph/g-series-15-3579-laptop/dell-g3-3579-setupandspecifications/getting-help-and-contacting-dell?guid=guid-79104453-0f4a-4408-a5d4-44abddd02cae&lang=en-us

   - This link provides the laptop's specifications, setup details, troubleshooting tools, and guidelines for contacting technical support.

   https://www.dell.com/support/product-details/en-ph/product/g-series-15-3579-laptop/drivers

   - The link provides information about BIOS, firmware, and device drivers that apply to G3 3579.

   https://www.dell.com/support/product-details/en-ph/product/g-series-15-3579-laptop/resources/articles

   - This link contains troubleshooting articles and other technical information related to the G3 3579.

3. Briefly describe any service notices you found on the website. A service notice example is a driver update, a hardware issue, or a recall notice for a laptop component.

   - For the G3 3579/3779, Dell has released important BIOS updates to fix security flaws. Version 1.20.0 fixes multiple CVEs, while version 1.21.0 offers more firmware fixes. Several Intel advisories were addressed by BIOS version 1.14.0. It is recommended that users who are having problems with overheating check the power management and ventilation settings. Additionally, Dell provides advice on how to handle battery failures, suggesting that swollen batteries be replaced. A motherboard short circuit has also been linked to some G3 15 3579 systems turning on without displaying an image, and crashes caused by excessive GPU use have resulted in community reports of Bluetooth and Wi-Fi problems.

4. Open forums may exist for your laptop. Use an Internet search engine to locate any open forums that focus on your laptop by typing in the name and model of the laptop. Briefly describe the websites (other than the manufacturer website) that you located.

   - Discussion in online communities that indicates several concerns regarding the Dell G3 15 3579 laptop, such as high CPU temperatures, fan behaviors, and the effects of BIOS updates on thermal management. Users inquire into RAM upgrade compatibility (16 GB and 32 GB), battery charging issues, and troubleshooting advice. On Reddit, the discussions touch on fan noise, hard drive performance, and persistent thermal issues, while the DIY Laptop Repair Forum emphasizes motherboard repairs. The Autodesk Community comments on overall performance and hardware configuration. Dell provides comprehensive support, including manuals and updates, but forums frequently address overheating, fan noise, battery problems, and motherboard issues.
