Lab – Mobile Device Information

Name: Sheika Anne Kadisha A. Roxas **Section:** CPE11S4

Introduction

In this activity, you will use the Internet, a technical journal, or a local store to gather information about an Android and an iOS device. You will document the specifications of each Android and iOS device onto this worksheet. Be prepared to discuss your decisions regarding the devices you select.

Recommended Equipment

- PC with Internet Connection

Instructions

Step 1: Select an Android and iOS device to research. Record the hardware specifications in the boxes below.

Specifications	Android Device	iOS Device
Model	*Honor X9d 5g (or MTN-NX1)*	*Apple iPhone 15 Pro (or A3101)*
Manufacturer	*Honor Device Co., Ltd*	*Foxconn and Pegatron*
Operating System	*MagicOS 10.0 Android 16*	*Initial:iOS 17* *Upgradability: iOS 26*
Available Memory	*RAM: 12GB* *Internal Storage options: 256GB or 512GB*	*RAM:8GB* *Internal Storage options: 128GB, 256GB, 512GB, 1TB*
Camera	*Dual rear camera system with 108-megapixel main sensor (f/1.8), Optical Image Stabilization (OIS), and 5-Megapixel wide/ultrawide lens (f/2.2)*	*48MP Main, 12MP Ultra-Wide, 12MP Telephoto (3x optical zoom), 12MP Front*
Wi-Fi Connectivity	*Wi-Fi 6 (802.11a/b/g/n/ac/ax) and Dual-band support for 2.4GHz and 5GHz*	*Wi-Fi 6E (802.11ax) with 2x2 MIMO*

Specifications	Android Device	iOS Device
Battery Information	*Silicon-Carbon Battery: 8300 mAh*	*Lithium-ion Battery:3,274 mAh*
Screen Size and Resolution	*Screen Size:6.79 inches* *Resolution: 2640 x 1200 pixels (1.5K)*	*Screen Size:6.1 inch* *Screen resolution: 2556 × 1179 pixels* *Pixel density: 460 ppi*
Size and Weight	*Size: Height – 161.9 mm* *Width – 76.1 mm* *Thickness (Depth) – 7.76* *Weight: Approx. 193 g*	*Size:* *Height: 5.77 inches (146.6 mm)* *Width: 2.78 inches (70.6 mm)* *Depth: 0.32 inches (8.25 mm)* *Weight: 6.60 ounces (187 grams)*

Step 2: Based on your research, which mobile device would you select? Be prepared to discuss your decisions regarding the mobile device you select.

Based on my research, I would choose the Honor X9d 5G. Being affordable is one thing, but using it daily, especially as a college student, is another. For me, I have been an Android user in my entire life, although iOS is present in my household because my mother and auntie are iOS users. Using Android is user-friendly, as it is flexible and seamlessly integrates with Google services. The phone that I'm using right now is the Honor X9d 5G, and this phone has similar functions to Apple, such as a high-rate smooth display, a high-resolution camera, and Wi-Fi connectivity. But the best thing for me is that the Honor X9d battery can last 2-3 days on a single charge. As a user who is clumsy, this phone has extreme durability and versatility; it can share files, photos, and videos to iPhones or other brands of Android by Quick Share and Honor Share for Honor users, and most especially, it is affordable. But if we discuss the best performance, superior camera, and no budget, then I would choose the iPhone 15 Pro. Apple is known for its good quality in cameras, especially when they are zoomed in; these are often used by people who are fond of going to concerts. Best performance because it has an A17 Pro chip that easily handles heavy 3D mobile gaming, intensive tasks, and fast video processing. Overall, I choose the Honor X9d 5G when it comes to budget-friendly, versatile, durable, and long-lasting. And I choose the iPhone 15 Pro when it comes to performance and the good quality of the camera.
